1971 municipal financial reports

VOLUME 1

the aggregate scene & highlight items-larger municipalities

FOREWORD

It gives me pleasure to release the 1971 MUNICIPAL FINANCIAL REPORTS DATA publications.

These new publications, which replace the "Summary of Financial Reports of Municipalities", represent a further step along the road to meaningful local sector financial information. This new series includes certain useful information not previously available. Further, the presentation of the data has been substantially altered to meet the needs of specific user groups. Lastly, these releases represent the culmination of the development of an automated system created to generate these publications. The reader is invited to refer to the Introduction immediately following for further elaboration.

INTRODUCTION

General: The 1971 series of publications, which replaces the "Summary of Financial Reports of Municipalities" (S.F.R.M.), mark the first phase of customized, computer-based information reports produced by the Ontario Municipal Finance Information System (O.M.F.I.S.), within the Municipal Finance Branch, Ministry of Treasury, Economics and Intergovernmental Affairs.

Development and data conversion problems caused the delay in the production of this first series. The equivalent 1972 series is scheduled to be available in the fall of 1973

Demands for municipal information are increasing both within and outside the Province. This makes it imperative that the basis of such information, primarily the annual municipal Financial Reports, be both accurate and available promptly after the end of the year to which the data relate. In order to achieve the fall deadline for future years, it will be necessary to adhere far more strictly to the statutory filling date of March 31st. In turn, this will mean that it will not be possible to accept Financial Reports for inclusion in the publications, which are filed long after the March 31st deadline.

With the increased flexibility which has been incorporated in the new automated system, it will be possible in the future, to provide more meaningful information geared to specific user requirements.

Series of 1971 Publications

Volume 1, Part 1: The Aggregate Scene: Presents a summary of data for all the municipalities in the Province. The equivalent 1970 data are to be found on pages XXVI to XXXVII of Volume 1 of the 1970 S.F.R.M.

Volume 1, Part 2: Highlight Items: Larger Municipalities: An analysis of highlights data is given for the larger municipalities (5,000 population or greater), including, in addition, each municipality in the metropolitan, regional and district areas.

Volumes 2A — 24: Municipal Financial Reports Data: An analysis of data for all municipalities in the Province configured on an upper tier (metropolitan, regional, district and county municipalities) basis. These data contain not only the detailed data that has been produced historically, but is presented on an upper tier configuration with the information grouped geographically, so that the reader is not burdened with unnecessary information.

Index: A master index appears at the back of all Volumes which keys the reader to the Volume, Part, and page number where data for a particular municipality appear.

The "Commentary" which appeared in Volume 1 of the 1970 S.F.R.M. does not appear in this new series of publications. The equivalent data that appeared in the "Commentary" will be incorporated in separate publications, and only the "Highlights" information features in this series.

Volume 1 (Parts 1 and 2) will be circulated to all the regular recipients of the previous series volumes 2A-2J are configured on an adjacent, upper tier basis rather than by population, as formerly was the case. These latter Volumes comprise len separate publications, and each municipality will automatically receive the appropriate Volume 2 publication. The complete set of the Volumes 2A-2J are available on request

Because the methods of summarization, presentation of the data, and certain terminology are somewhat changed, the remaining comments have been prepared as a guide to the reader

Although the comments and data in each of the two Volumes are freestanding, a reader is advised to study the "Guide for the Reader" in both Volumes before comparisons and analyses are conducted

Guide for the Reader

1. Information for two municipalities was not available for inclusion in these publications. These two municipalities are: the Township of Manvers (Northumberland and Durham County), and Gwillimbury, West (Simcoe County). The exclusion of data for these two municipalities is statistically insignificant.

The dollar figures, except ratios, have all been rounded to the nearest \$'000s, with the further exception of dollar figures used in the footnotes. This means that horizontal and vertical totals may not equal the sum of the components.

3. Every effort has been made to make a reader's task easier, by reducing the number of footnotes to a minimum, consistent with accurate and meaningful reporting. It will be noticed, therefore, that throughout these publications only significant items have been made the subject of footnotes.

Volume 1 Part 1

- The information is presented within the twelve main categories with further analyses provided of towns, villages and townships, which constitute the significant number of municipalities
- 2. The line "Total Local Municipalities" is the total of all the categories from "Metropolitan Toronto Area" to "Improvement Districts" inclusive. Counties are not local municipalities and are thus freestanding. If a reader wishes to obtain the totals of items for all municipalities in the Province, then he should sum the "Total Local Municipalities" and "Counties" lines. He should be aware that such a Provincial total would include items reported in both the upper and lower tier municipalities. "Lower tier municipalities" means all municipalities except metropolitian, regional, district and county municipalities
- 3. Metropolitan, Regional and District Areas: From January 1, 1971, there were five of these such areas which had been subject to major municipal restructure. The functions of the upper and lower tier municipalities within these areas vary somewhat and a reader should have reference to the appropriate legislation to find the description of the organization and functions for each of the municipalities. The information for these areas is given after the "contra" items have been excluded. The purpose of these "contra" items, which are detailed in Volume 2A-2J, is to exclude items which would be otherwise double-counted (in the information for the upper and lower tier municipalities).
- 4. The information for the Moosonee Area Development Board has been included with "Townships. Less than 2,500 in Districts" rather than with "Improvement Districts" as was ormerly the case

Number of Municipalities: This column, which is repeated on every page, shows the number of municipalities within each category and sub-category.

Analyses of Population, Households and Assessment

Population: Means the total population residing in the municipality at the time of the 1971 assessment census, less those people resident in institutions, defence establishments and on Indian Reserves. The population is for municipally-organized areas only, which, in total, account for about 95% of the total population of the Province.

In each municipality there is a small number of people, for whom it was not possible to classify in the correct age category. These people have been included in the age category "20-65 Years", as experience shows that this is most likely correct

Statistics Canada conducted its quinquennial census in 1971. There are small differences between the populations in these publications and the information published by Statistics Canada. The differences are not statistically significant and reflect differences in the methods and timetables used in conducting the two censuses.

Households: Means a single family dwelling unit or a portion of a building which is a domestic establishment consisting of two or more rooms in which the occupants usually eat, steep and prepare meals

Assessment: To present assessment information in a meaningful way it is necessary to present three sets of figures

(i) "Assessment Used For 1971 Taxes": This is the assessment which was used as the basis for the 1971 tax levies, analyzed between public and separate school board support.

(ii) "Provincial Equalized Taxable Assessment": This is the assessment brought to a uniform level of assessment, by application of the published municipal equalization factors, as amended by changes resulting from successful appeals to the Ontario Municipal Board.

Items (i) and (ii) above are based on the 1971 Financial Report.

(iii) "Analysis Of Assessment Taken In 1970 For 1971 As Per The Return Of Assessment": This shows the assessment by various classes of property. There are minor differences between the total of this analysis and the total of item (i) above, due to appeals and amendments

Analysis of Tax Roll

This analysis shows the main purposes of taxation.

Municipal: Includes the general lower tier municipal levy and special area rates, if any.

Metropolitan, Regional and County: This is the lower tier municipal levy on behalf of the respective upper tier municipality.

School Boards: The tax levies for elementary (public and separate) and secondary school boards

Special Charges: Includes such items as local improvement charges, sewer rates etc., which are charges levied on defined groups of flax payers, it also includes the taxes on universities and colleges of applied arts and technology.

Miscellaneous Charges: Items, other than taxation, which have been added to the tax bills for collection, such as agricultural organization fees and public utility arrears.

Adjustments: Includes such items as the difference between the computed and the minimum tax for municipal and school purposes, and telephone company tax adjustments.

Gross Tax Roll: This represents the total of the above six items.

Residential Property Tax Reduction: Although the municipalities deduct these amounts from the tax bills, for reporting purposes, the taxation is reported net with the total Provincial reimbursement shown as municipal revenue.

Total Tax Roll: The gross tax roll less the residential property tax reduction.

Total Tax Roll Per Capita: The absolute total of the tax roll divided by the population.

Residential and Farm Taxation

Per Household: The absolute residential and farm realty taxation, shown on the "Statements of Revenue", divided by the number of households.

Per Cent of Total Taxation: The percentage that the residential and farm realty taxation represents of the "Taxation: Total", both shown on the "Statements of Revenue".

Statements of Revenue

These analyses show the main sources of municipal revenue for the year. The headings follow those of previous years and are directly related to the classifications in the 1971 Financial Report and the equivalent 1970 publication.

Residential Property Tax Reduction: There are small differences, due to year-end adjustments, etc. between the figures reported here and the amounts shown in the "Analyses of Tax Roll"

Statements of Expenditure

These Statements show the municipal expenditures for the year, functionalized over the major categories. This analysis follows that given in the 1971 Financial Report and the equivalent 1970 publication.

Capital Fund Operations

The main sources of municipal capital financing are shown, together with the capital expenditures and transfers during the year.

Unfinanced Capital Outlay, Year End: Is the extent to which capital outlay has not been met by capital financing at the end of the year.

Unexpended Capital Financing, Year End: Is the extent to which capital financing has not been expended at the end of the year.

It is pertinent here to distinguish "Capital Outlay". The definition is taken from the Bulletin 5 of "A Guide for Municipal Treasurers and Auditors . . . ", which was published by the former Department of Municipal Affairs.

The term "capital outlay" for local government financial reporting purposes comprises two elements, namely:

- capital expenditure and
- transfers of capital funds to other organizations

These two elements are further defined below:

Capital expenditure is "any significant expenditure incurred to acquire or improve land, buildings, engineering structures, machinery and equipment used in providing municipal services. This expenditure normally confers benefit lasting beyond one year and results in the acquisition of, or extends the life of, a fixed asset or long-term work. It includes vehicles, office furniture and equipment.

Expenditure on repair or maintenance designed to maintain an asset in its original state is not to be reported as capital expenditure.

Transfers of capital funds to other organizations refers to "the proceeds of long term liabilities transferred to local boards, municipal enterprises, hospitals, universities, and other similar organizations for which the municipality may incur long term liabilities".

Revenue Fund Balance Sheets

The main items appearing on the municipal revenue fund balance sheets are displayed. The content is comparable to the 1970 format.

Analyses of Arrears

Reconciliation Year End 1971: Displays the total year end tax arrears analyzed between the years to which the arrears relate, and shows the element of penalties and interest separately. In some cases, the municipal records do not permit the penalties and interest element to be separately identified.

Total Arrears: Shows the absolute total tax arrears per capita and as a percentage of the total tax roll

Pertinent Revenue Fund Items: Discount on Taxes: In the case of counties, this is the discount for prompt payment of the county requisition, allowed by the county to the constituent lower tier municipalities. No similar item for counties appeared in the publications for previous years, per se, but the equivalent item was included in the "Statements of Expenditure: Interest, Discounts, Allowances and Reserves".

Capital Fund Balance Sheets

The main items appearing in the municipal capital fund balance sheets are displayed. Again, the content is comparable to the 1970 format.

Analyses of Net Long Term Liabilities and Debt Charges

The analyses show the reconciliation from "gross" to "net" long term liabilities, the related debt charges, and certain pertinent ratios.

Total Net Long Term Liabilities: Per Capita: The population for each constituent lower tier municipality in an upper tier is included at the lower tier level. This means that a reader should bear in mind that the figures for the lower tier municipality do not include any share of the net long term liabilities of the upper tier municipality.

Volume 1, Part 2

This new analysis presents the highlights information for the larger municipalities (5,000 population or greater) and also includes highlights information for each municipality within the metropolitan, regional and district areas. Following information for the metropolitan, regional and district areas, information is presented for cities, separated towns, towns and townships, with a subtotal for each of these status categories, and a grand total of all the categories. The order, within status, is descending population. The subtotals for the metropolitan, regional and district areas are after the "contra" items have been deducted Therefore, in these areas, the sum of the constitutent lower ther municipalities does not equal the printed subtotals by the amount of any "contra" items. These "contra" items are detailed in Volumes 2A-2J

In order to assist the reader, the information has been arranged vertically in blocks of not more than five municipalities.

The reader is advised to consult the comments pertinent to Part 1, in addition to the notes below

Demographic and Taxation Highlights

Population and Households: Please refer to comments pertinent to Part 1.

Taxable Assessment: Local: Identical to "Assessment Used For 1971 Taxes: Total Taxable Assessment" in Part 1.

Taxable Assessment: Equalized: Identical to "Provincial Equalized Taxable Assessment" in Part 1.

Total Taxation: Identical to "Taxation: Total" in Part 1.

Residential and Farm Taxation: Total: Identical to "Taxation: Realty: Residential and Farm" in Part 1.

Residential and Farm Taxation: % Total Tax: Identical to "Residential and Farm Taxation Per Cent of Total Taxation" in Part 1

Year End Tax Arrears: Total: Identical to "Analyses of Arrears" Reconciliation Year End 1971: Total" in Part 1.

Year End Tax Arrears: % Tax Roll: Identical to "Analyses of Arrears: Total Arrears: Per Cent of Total Tax Roll" in Part 1.

Revenue Fund: Own Expenditures

The analyses are at the main function of expenditure level. Part 1 gives the equivalent expenditure at the sub-functional level in certain cases, and thus, is in somewhat more detail, but otherwise the two Parts are comparable.

Revenue Fund: Transfers

Upper Tier Levy: The levy by the lower tier municipality on behalf of the upper tier municipality.

Education: The total municipal expenditure for elementary (public and separate) and secondary school purposes and includes the municipal contribution to universities and colleges.

Total Own Expenditures and Transfers

The column is the sum of: Revenue Fund: Own Expenditures; and Revenue Fund: Transfers

Revenue Fund: Revenues

The analyses given, show the main categories of revenue. Part 1 gives the same information in somewhat more detail, but otherwise the two Parts are comparable.

Revenue Fund Surplus / (Deficit)

The net result of the year's operations, and represents either an excess of revenue over expenditure (positive) or vice versa (negative) for the year

Capital Fund: Operations

Liabilities incurred: The sum of the long term liabilities incurred during the year. The analyzed sources are shown in Part 1

Capital Subsidies: The sum of the capital contributions from other governments, which can be found analyzed, as to program totals, in Part 1.

Other Capital Sources: The sum of contributions from: (i) reserve funds and reserves (ii) the revenue fund, and (iii) other sources, towards capital outlay

Own Capital Applications: The sum of capital expenditures made during the year. Part 1 provides an analysis of the capital expenditures over the main functions.

Capital Transfers: The sum of capital transfers made to (i) municipal enterprises (ii) area municipalities within metropolitan, regional and district areas (iii) local boards which are not municipal enterprises, and (iii) to revenue find

Liquidity Change: The excess of capital financing for the year over capital outlay for the year, or vice versa. A positive amount indicates the former, and a negative amount represents the latter. This amount also indicates the difference between the opening and closing balances of the capital fund.

Net Long Term Liabilities

Net Long Term Liabilities: Total: The sum of net long term liabilities for general municipal activities and municipal enterprises

Net Long Term Liabilities: % Equalized Assessment: Identical to the corresponding figure in Part 1.

Net Long Term Debt Charges

Net Long Term Debt Charges: Total: Identical to "Debt Charges: 1971: Total" in Part 1.

Net Long Term Debt Charges: % Total Revenue: Identical to "Debt Charges. 1971. Per Cent
of Total Revenue" in Part 1.

Concluding Comment

These publications represent the first step towards the provision of fully-integrated municipal information. In the future, with increasing demands at all levels of government for this type of information, the Ministry will be better able to answer both generic, and ad hoc requests. The process of development and refinement is, by its very nature, an on-going one, and the Ministry welcomes constructive criticisms and suggestions about the format and contents of these publications. Such comment, and any inquiries about the contents of these publications, should be addressed to:

FOREWORD 2	THE AGGREGATE SCENE
INTRODUCTION 3	HIGHLIGHT ITEMS — LARGER MUNICIPALITIES20
HIGHLIGHTS 7	INDEX(i

1971 HIGHLIGHTS

- 1971 population exceeds 7,388,000 persons. The year to year absolute increase,
 173,000 persons, is the biggest of the past decade. The relative increase,
 2.4%,
 is slightly higher than the 2.2% average for the previous ten years.
- 1971 taxation revenue, \$1,499.7 million rose 2.8% versus 10.5% in the previous year, with the main Property Tax Reduction Program allowed for in both cases. If allowance is made for the supplementary payments under the program, the increases respectively drop to 0.5% and 8.5%.
- Provincial grants paid to municipalities and school boards, \$1,701.3 million, equalled 113.4% of 1971 taxation revenue. This compares to 97.1% in 1970.
 Again, allowing for the supplementary payments, these ratios rise to 115.2% and 99.2% respectively.
- 1971 operating revenues were reported to be \$2,218.3 million, up 7.2%. The
 increase in such revenues slightly exceeded the rise in expenditures. As a
 result, there was an aggregate \$3.7 million surplus.
- Contributions to education, coming from local taxation in 1971 totalled \$756.6 million. They accounted for 35.2% of local municipalities' total revenue. The figures for 1970 were \$817.6 million and 40.4%.
- 1971 capital expenditures reached a record \$433.3 million, up 27.4% from 1970.
 A net \$130.8 million, or 30.2%, of such expenditures still needed to be permanently financed at the end of 1971.
- At the end of 1971, taxes receivable totalled \$128.5 millions (before \$9.5 million allowance for uncollectable taxes), representing 8.6% of aggregate 1971 tax rolls. The year earlier figures were \$132.2 millions and 9.1%.
- Net long term liabilities of municipalities and their enterprises were \$1,706.1 million (excluding \$348.9 million for certain school board debt reported herein) at year end 1971. The year to year increase was \$65.0 million or 4.0%.

1971 municipal financial reports

VOLUME 2A

municipalities attracted within the metro toronto area and the regional areas of niagara, ottawa-carleton, york, muskoka

FOREWORD

It gives me pleasure to release the 1971 MUNICIPAL FINANCIAL REPORTS DATA publications.

These new publications, which replace the "Summary of Financial Reports of Municipalities", represent a further step along the road to meaningful local sector financial information. This new series includes certain useful information not previously available. Further, the presentation of the data has been substantially altered to meet the needs of specific user groups. Lastly, these releases represent the culmination of the development of an automated system created to generate these publications. The reader is invited to refer to the Introduction immediately following for further elaboration.

INTRODUCTION

General: The 1971 series of publications, which replaces the "Summary of Financial Reports of Municipalities" (S.F.R.M.), mark the first phase of customized, computer-based information reports produced by the Ontario Municipal Finance Information System (O.M.F.I.S.), within the Municipal Finance Branch, Ministry of Treasury, Economics and Intergovernmental Affairs

Development and data conversion problems caused the delay in the production of this first series. The equivalent 1972 series is scheduled to be available in the fall of 1973.

Demands for municipal information are increasing both within and outside the Province. This makes it imperative that the basis of such information, primarily the annual municipal Financial Reports, be both accurate and available promptly after the end of the year to which the data relate. In order to achieve the fall deadline for future years, It will be necessary to adhere far more strictly to the statutory filing date of March 31st. In turn, this will mean that it will not be possible to accept Financial Reports for inclusion in the publications, which are filed long after the March 31st deadline.

With the increased flexibility which has been incorporated in the new automated system, it will be possible in the future, to provide more meaningful information geared to specific user requirements.

Series of 1971 Publications

Volume 1, Part 1: The Aggregate Scene: Presents a summary of data for all the municipalities in the Province. The equivalent 1970 data are to be found on pages XXVI to XXXVII of Volume 1 of the 1970 S.F.R.M.

Volume 1, Part 2: Highlight Items: Larger Municipalities: An analysis of highlights data is given for the larger municipalities (5,000 peopulation or greater), including, in addition, each municipality in the metropolitan, regional and district areas

Volumes 2A — 2J: Municipal Financial Reports Data: An analysis of data for all municipalities in the Province configured on an upper tier (metropolitan, regional, district and county municipalities) basis. These data contain not only the detailed data that have been produced historically, but are presented on an upper tier configuration with the information crouped geographically, so that the reader is not burdened with unnecessary information.

Index: A master index appears at the back of all Volumes which keys the reader to the Volume. Part, and page number where data for a particular municipality appear

The "Commentary" which appeared in Volume 1 of the 1970 S.F. R.M. does not appear in this new series of publications. The equivalent data that appeared in the "Commentary" will be incorporated in separate publications, and only the "Highlights" information features in this series.

Volume 1 (Parts 1 and 2) will be circulated to all the regular recipients of the previous series Volumes 2A — 2J are configured on an adjacent, upper fier basis rather than by population, as formerly was the case. These latter Volumes comprise ten separate publications, and each municipality will automatically receive the appropriate Volume 2 publication. The complete set of the Volumes 2A—2J are available on reguest.

Because the methods of summarization, presentation of the data, and certain terminology are somewhat changed, the remaining comments have been prepared as a guide to the reader

Atthough the comments and data in each of the two Volumes are freestanding, a reader is advised to study the "Guide for the Reader" in both Volumes before comparisons and analyses are conducted.

Guide for the Reader

- 1 Information for two municipalities was not available for inclusion in these publications. These two municipalities are: the Township of Manvers (Northumberland and Durham County), and Gwillimbury, West (Simcoe County). The exclusion of data for these two municipalities is statistically insignificant.
- The dollar figures, except ratios, have all been rounded to the nearest \$'000s, with the further exception of dollar figures used in the footnotes. This means that horizontal and vertical totals may not equal the sum of the components
- 3. Every effort has been made to make a reader's task easier, by reducing the number of footnotes to a minimum, consistent with accurate and meaningful reporting. It will be noticed, therefore, that throughout these publications only significant items have been made the subject of footnotes.

Volume 2. Parts A - J

The reader is advised to consult, in addition to these notes, the "Introduction" to Volume 1. The following comments are generally restricted to items unique to this Volume.

1. The information is presented in the following format:

Metropolitan Toronto Area — Part A Niagara Regional Area — Part A

Ottawa-Carleton Regional Area - Part A

York Regional Area — Part A Muskoka District Area — Part A

Counties Parts B — J: certain adjacent counties are grouped together in one Part.

Thus, every municipality, both upper and lower tier, is listed in one of the Parts.

- 2 In the case of the metropolitan, regional and district areas, the total lines are after the "contra" items have been removed
- 3. As in Volume 1, "N.A." means "Not Applicable" and "NEGL" means "Negligible in amount".

Demographics

Population: Please refer to comments pertinent to Volume 1 Households: Please refer to comments pertinent to Volume 1

Equalized Tayable Accessment

Identical to "Provincial Equalized Taxable Assessment" and "Taxable Assessment: Equalized" in Volume 1.

Assessment for Current Year

Taxable by School Support: Public: Separate; Total: Identical to "Assessment Used for 1971 Taxes" in Volume 1.

As Per Return By Property Class: Identical to the equivalent data in Volume 1, with the addition of a "Total" column

Each Property Class — % of Total: Shows the size of each of the four classes of property, in percentage terms, relative to the total assessment.

Residential and Farm Tax Burden

Per capita; % Total Taxation: Indicates the residential, and farm taxation (municipal and school purposes) per capita, and as a percentage of total taxation (municipal and school purposes).

Tax Roll Analysis

Identical to corresponding figures in Volume 1.

Current Year End Tax Arrears

Identical to corresponding figures in Volume 1.

Year End Taxation Detail:

Identical to corresponding figures in Volume 1.

Pertinent Current Year Items

Identical to corresponding figures in Volume 1.

Revenue Fund Revenue

Presents the same information that appears in Volume 1 with some small differences in the order of the items, and in the terminology used.

Revenue Fund, Revenue Component Analysi

This new analysis displays the relative size, in percentage terms, of the components of Revenue Fund: Revenues, Because of rounding, the sum of the components may not total to 100%

Revenue Fund: Own Expenditures

Identical to the "Statements of Expenditure: General Municipal Expenditures" in Volume 1.

Royceup Eupd Transfer

Identical to the "County: Share of Expenditure" and "Education — Local Contributions" in Volume 1.

Total Own Expenditures and Transfers

Identical to "Total Expenditure" in Volume 1.

Revenue Fund Surplus/ Delicit

Identical to "Excess/(Deficiency) of Revenue in 1971" in Volume 1.

Own Expenditures and Transfers: Component Analysis

This new analysis displays, at the main function level, the relative size, in percentage terms, of the components of Revenue Fund: Own Expenditures and Transfers.

Canital Fund: Source

Very similar to the corresponding figures in Volume 1.

Capital Fund: Own Applications

Identical to the corresponding figures in Volume 1.

Capital Fund: Transfers

Identical to the corresponding figures in Volume 1.

otal Own Applications and Transfers

The total of the two previous items

Capital Fund Liquidity Change

This item represents the year's excess of Capital Fund: Sources, over, Total Own Applications and Transfers, or vice versa

Net Long Term Debt Reconciliation

Very similar to the corresponding figures in Volume 1.

Net Long Term Debt

Identical to "Total Net Long Term Liabilities: Per Capita; As Per Cent of Equalized Assessment" in Volume 1.

Net Long Term Debt Charges Analysis

Very similar to the corresponding figures in Volume 1.

801 Bay Street, Toronto, Ontario, M5S 121

Concluding Comment

These publications represent the first step towards the provision of fully-integrated municipal information. In the future, with increasing demands at all levels of government for this type of information, the Ministry will be better able to answer both generic and ad hoc requests. The process of development and refinement is, by its very nature, an on-going one, and the Ministry welcomes constructive criticisms and suggestions about the format and contents of these publications. Such comment, and any inquiries about the contents of these publications, should be addressed to:

Ontario Municipal Finance Information System, (O.M.F.J.S.), Municipal Finance Branch Ministry of Treasury, Economics and Intergovernmental Affairs

CONTENTS

FOREWORDiii	HIGHLIGHTSvi
INTRODUCTIONiv	FINANCIAL ETC. INFORMATION Page 1
TABLE OF CONTENTS vi	INDEX(i)

1971 HIGHLIGHTS

- 1971 population exceeds 7.388.000 persons. The year to year absolute increase, 173,000 persons, is the biggest of the past decade. The relative increase, 2.4%, is slightly higher than the 2.2% average for the previous ten years.
- 1971 taxation revenue, \$1,499.7 million rose 2.8% versus 10.5% in the previous year, with the main Property Tax Reduction Program allowed for in both cases. If allowance is made for the supplementary payments under the program, the increases respectively drop to 0.5% and 8.5%.
- Provincial grants paid to municipalities and school boards, \$1,701.3 million, equalled 113.4% of 1971 taxation revenue. This compares to 97.1% in 1970.
 Again, allowing for the supplementary payments, these ratios rise to 115.2% and 99.2% respectively.
- 1971 operating revenues were reported to be \$2,218.3 million, up 7.2%. The
 increase in such revenues slightly exceeded the rise in expenditures. As a
 result, there was an aggregate \$3.7 million surplus.
- Contributions to education, coming from local taxation in 1971 totalled \$756.6 million. They accounted for 35.2% of local municipalities' total revenue. The figures for 1970 were \$817.6 million and 40.4%.
- 1971 capital expenditures reached a record \$433.3 million, up 27.4% from 1970.
 A net \$130.8 million, or 30.2%, of such expenditures still needed to be permanently financed at the end of 1971.
- At the end of 1971, taxes receivable totalled \$128.5 millions (before \$9.5 million allowance for uncollectable taxes), representing 8.6% of aggregate 1971 tax rolls. The year earlier figures were \$132.2 millions and 9.1%.
- Net long term liabilities of municipalities and their enterprises were \$1,706.1 million (excluding \$348.9 million for certain school board debt reported herein) at year end 1971. The year to year increase was \$65.0 million or 4,097.

1971 municipal financial reports

VOLUME 2B

municipalities situated within the counties of elgin, essex, kent, lambton, middlesex

FOREWORD

It gives me pleasure to release the 1971 MUNICIPAL FINANCIAL REPORTS DATA publications.

These new publications, which replace the "Summary of Financial Reports of Municipalities", represent a further step along the road to meaningful local sector financial information. This new series includes certain useful information not previously available. Further, the presentation of the data has been substantially altered to meet the needs of specific user groups. Lastly, these releases represent the culmination of the development of an automated system created to generate these publications. The reader is invited to refer to the Introduction immediately following for further elaboration.

Minister

INTRODUCTION

General: The 1971 series of publications, which replaces the "Summary of Financial Reports of Municipalities" (S.F.R.M.), mark the first phase of customized, computer-based information reports produced by the Ontario Municipal Finance Information System (O.M.F.I.S.), within the Municipal Finance Branch, Ministry of Treasury, Economics and Intergovernmental Affairs

Development and data conversion problems caused the delay in the production of this first series. The equivalent 1972 series is scheduled to be available in the fall of 1973

Demands for municipal information are increasing both within and outside the Province. This makes it imperative that the basis of such information, primarily the annual municipal Financial Reports, be both accurate and available promptly after the end of the year to which the data relate. In order to achieve the fall deadline for future years, it will be necessary to adhere far more strictly to the statutory filing date of March 31st. In turn, this will mean that it will not be possible to accept Financial Reports for inclusion in the publications, which are filted long after the March 31st deadline.

With the increased flexibility which has been incorporated in the new automated system, it will be possible in the future, to provide more meaningful information geared to specific user requirements.

Series of 1971 Publications

Volume 1. Part 1: The Aggregate Scene: Presents a summary of data for all the municipalities in the Province. The equivalent 1970 data are to be found on pages XXVI to XXXVII of Volume 1 of the 1970 S.F.R.M.

Volume 1, Part 2: Highlight Items: Larger Municipalities: An analysis of highlights data is given for the larger municipalities (5.000 population or greater), including, in addition, each municipality in the metropolitan, regional and district areas.

Volumes 2A — 2J: Municipal Financial Reports Data: An analysis of data for all municipalities in the Province configured on an upper tier (metropolitan, regional, district and county municipalities) basis. These data contain not only the detailed data that have been produced historically, but are presented on an upper tier configuration with the information grouped geographically, so that the reader is not burdened with unprecessary information.

Index: A master index appears at the back of all Volumes which keys the reader to the Volume. Part, and page number where data for a particular municipality appear.

The "Commentary" which appeared in Volume 1 of the 1970 S.F.R.M. does not appear in this new series of publications. The equivalent data that appeared in the "Commentary" will be incorporated in separate publications, and only the "Highlights" information features in this series

Volume 1 (Parts 1 and 2) will be circulated to all the regular recipients of the previous series Volumes 2A — 2J are configured on an adjacent, upper tier basis rather than by population, as formerly was the case. These latter Volumes comprise ten separate publications, and each municipality will automatically receive the appropriate Volume 2 publication. The complete set of the Volumes 2A—2J are available on reguest.

Because the methods of summarization, presentation of the data, and certain terminology are somewhat changed, the remaining comments have been prepared as a guide to the reader

Although the comments and data in each of the two Volumes are freestanding, a reader is advised to study the "Guide for the Reader" in both Volumes before comparisons and analyses are conducted

Guide for the Reader

I Information for two municipalities was not available for inclusion in these publications. These two municipalities are the Township of Manyers (Northumberland and Durham County), and Gwillimbury, West (Simooe County). The exclusion of data for these two municipalities is statistically instinguished.

2. The dollar figures, except ratios, have all been rounded to the nearest \$'000s, with the further exception of dollar figures used in the footnotes. This means that horizontal and vertical totals may not equal the sum of the components.

3. Every effort has been made to make a reader's task easier, by reducing the number of footnotes to a minimum, consistent with accurate and meaningful reporting. It will be noticed, therefore, that throughout these publications only significant items have been made the subject of footnotes.

Volume 2. Parts A - J

The reader is advised to consult, in addition to these notes, the "Introduction" to Volume 1. The following comments are generally restricted to items unique to this Volume.

1. The information is presented in the following format:

Metropolitan Toronto Area — Part A Niagara Regional Area — Part A Ottawa-Carleton Regional Area — Part A York Regional Area — Part A Muskoka District Area — Part A

Counties: Parts B — J: certain adjacent counties are grouped together in one Part. Thus, every municipality, both upper and lower tier, is listed in one of the Parts.

2. In the case of the metropolitan, regional and district areas, the total lines are after the "contra" items have been removed

3. As in Volume 1, "N.A." means "Not Applicable" and "NEGL" means "Negligible in amount".

Demographics

Population: Please refer to comments pertinent to Volume 1 Households: Please refer to comments pertinent to Volume 1

Equalized Taxable Assessment

Identical to "Provincial Equalized Taxable Assessment" and "Taxable Assessment: Equalized" in Volume 1.

Assessment for Current Year

Taxable by School Support: Public; Separate; Total: Identical to "Assessment Used for 1971 Taxes" in Volume 1.

As Per Return By Property Class: Identical to the equivalent data in Volume 1, with the "addition of a "Total" column

Each Property Class — % of Total: Shows the size of each of the four classes of property, in percentage terms, relative to the total assessment,

Residential and Farm Tax Burden

Per capita; % Total Taxation: Indicates the residential, and farm taxation (municipal and school purposes) per capita, and as a percentage of total taxation (municipal and school purposes)

Tax Roll Analysis

Identical to corresponding figures in Volume 1.

Current Year End Tax Arrear

Identical to corresponding figures in Volume 1.

Year End Taxation Details

Identical to corresponding figures in Volume 1.

Pertinent Current Year Items

Identical to corresponding figures in Volume 1.

Revenue Fund, Revenues

Presents the same information that appears in Volume 1 with some small differences in the order of the items, and in the terminology used

Revenue Fund: Revenue Component Analysis

This new analysis displays the relative size, in percentage terms, of the components of Revenue Fund: Revenues. Because of rounding, the sum of the components may not total to 100%.

Revenue Fund: Own Expenditures

Identical to the "Statements of Expenditure General Municipal Expenditures" in Volume 1.

Revenue Fund Transfers

Identical to the "County: Share of Expenditure" and "Education — Local Contributions" in Volume 1.

Total Own Expenditures and Transfers

Identical to "Total Expenditure" in Volume 1.

Revenue Fund Surplus/Deficit

Identical to "Excess/(Deficiency) of Revenue in 1971" in Volume 1.

Own Expenditures and Transfers: Component Analysis

This new analysis displays, at the main function level, the relative size, in percentage terms, of the components of Revenue Fund: Own Expenditures and Transfers

Capital Fund: Sources

Very similar to the corresponding figures in Volume 1.

Capital Fund: Own Applications

Identical to the corresponding figures in Volume 1.

Capital Fund: Transfers

Identical to the corresponding figures in Volume 1.

Total Own Applications and Transfers

The total of the two previous items

Capital Fund Liquidity Change

This item represents the year's excess of Capital Fund: Sources, over, Total Own Applications and Transfers, or vice versa.

Net Long Term Debt Reconciliation

Very similar to the corresponding figures in Volume 1.

let Long Term Debt

Identical to "Total Net Long Term Liabilities: Per Capita; As Per Cent of Equalized Assessment" in Volume 1.

Net Long Term Debt Charges Analysis

Very similar to the corresponding figures in Volume 1.

Concluding Comment

These publications represent the first step towards the provision of fully-integrated municipal information. In the future, with increasing demands at all levels of government for this type of information, the Ministry will be better able to answer both generic and ad noc requests. The process of development and refinement is, by its very nature, an on-going one, and the Ministry welcomes constructive criticisms and suggestions about the format and contents of these publications. Such comment, and any inquiries about the contents of these publications, should be addressed to:

INTRODUCTION	FINANCIAL ETC. INFORMATION Page 1
TABLE OF CONTENTS vi	INDEX(ii

1971 HIGHLIGHTS

- 1971 population exceeds 7,388,000 persons. The year to year absolute increase, 173,000 persons, is the biggest of the past decade. The relative increase, 2.4%, is slightly higher than the 2.2% average for the previous ten years.
- 1971 taxation revenue, \$1,499.7 million rose 2.8% versus 10.5% in the previous year, with the main Property Tax Reduction Program allowed for in both cases. If allowance is made for the supplementary payments under the program, the increases respectively drop to 0.5% and 8.5%.
- Provincial grants paid to municipalities and school boards, \$1,701.3 million, equalled 113.4% of 1971 taxation revenue. This compares to 97.1% in 1970.
 Again, allowing for the supplementary payments, these ratios rise to 115.2% and 99.2% respectively.
- 1971 operating revenues were reported to be \$2,218.3 million, up 7.2%. The
 increase in such revenues slightly exceeded the rise in expenditures. As a
 result, there was an aggregate \$3.7 million surplus.
- Contributions to education, coming from local taxation in 1971 totalled \$756.6 million. They accounted for 35.2% of local municipalities' total revenue. The figures for 1970 were \$817.6 million and 40.4%.
- 1971 capital expenditures reached a record \$433.3 million, up 27.4% from 1970.
 A net \$130.8 million, or 30.2%, of such expenditures still needed to be permanently financed at the end of 1971.
- At the end of 1971, taxes receivable totalled \$128.5 millions (before \$9.5 million allowance for uncollectable taxes), representing 8.6% of aggregate 1971 tax rolls. The year earlier figures were \$132.2 millions and 9.1%.
- Net long term liabilities of municipalities and their enterprises were \$1,706.1 million (excluding \$348.9 million for certain school board debt reported herein) at year end 1971. The year to year increase was \$65.0 million or 4,0%.

1971 municipal financial reports

VOLUME 2C

municipalities situated within
the counties of
brant, haldimand, norfolk,
oxford, perth

FOREWORD

It gives me pleasure to release the 1971 MUNICIPAL FINANCIAL REPORTS DATA publications.

These new publications, which replace the "Summary of Financial Reports of Municipalities", represent a further step along the road to meaningful local sector financial information. This new series includes certain useful information not previously available. Further, the presentation of the data has been substantially altered to meet the needs of specific user groups. Lastly, these releases represent the culmination of the development of an automated system created to generate these publications. The reader is invited to refer to the Introduction immediately following for further elaboration.

Minister Minister

INTRODUCTION

General: The 1971 series of publications, which replaces the "Summary of Financial Reports of Municipalities" (S.F.R.M.), mark the first phase of customized, computer-based information reports produced by the Ontario Municipal Finance Information System (O.M.F.L.S.), within the Municipal Finance Branch, Ministry of Treasury, Economics and Intergovernmental Affairs

Development and data conversion problems caused the delay in the production of this first series. The equivalent 1972 series is scheduled to be available in the fall of 1973.

Demands for municipal information are increasing both within and outside the Province. This makes it imperative that the basis of such information, primarily the annual municipal Financial Reports, be both accurate and available promptly after the end of the year to which the data relate. In order to achieve the fall deadline for future years, it will be necessary to adhere far more strictly to the statutory filing date of March 31st in turn, this will mean that it will not be possible to accept Financial Reports for inclusion in the publications, which are filed long after the March 31st deadline.

With the increased flexibility which has been incorporated in the new automated system, it will be possible in the future, to provide more meaningful information geared to specific user requirements

Series of 1971 Publications

Volume 1, Part 1: The Aggregate Scene: Presents a summary of data for all the municipalities in the Province. The equivalent 1970 data are to be found on pages XXVI to XXXVII of Volume 1 of the 1970 S.F.R.M.

Volume 1, Part 2: Highlight Items: Larger Municipalities: An analysis of highlights data given for the larger municipalities (5.000 population or greater), including, in addition, each municipality in the metropolitan, regional and district areas

Volumes 2A — 2J: Municipal Financial Reports Data: An analysis of data for all municipalities in the Province configured on an upper tier (metropolitan, regional, district and county municipalities) basis. These data contain not only the detailed data that have been produced historically, but are presented on an upper tier configuration with the information grouped geographically, so that the reader is not burdened with unnecessary information.

Index: A master index appears at the back of all Volumes which keys the reader to the Volume. Part, and page number where data for a particular municipality appear

The "Commentary" which appeared in Volume 1 of the 1970 S.F.R.M. does not appear in this new series of publications. The equivalent data that appeared in the "Commentary" will be incorporated in separate publications, and only the "Highlights" information features in this series.

Volume 1 (Parts 1 and 2) will be circulated to all the regular recipients of the previous series, volumes 2A — 2J are configured on an adjacent, upper fier basis rather than by population, as formerly was the case. These latter Volumes comprise ten separate publications, and each municipality will automatically receive the appropriate Volume 2 publication. The complete set of the Volumes 2A—2J are available on request.

Because the methods of summarization, presentation of the data, and certain terminology are somewhat changed, the remaining comments have been prepared as a guide to the reader

Although the comments and data in each of the two Volumes are freestanding, a reader is advised to study the "Guide for the Reader" in both Volumes before comparisons and analyses are conducted.

Guide for the Reader

- 1 Information for two municipalities was not available for inclusion in these publications. These two municipalities are the Township of Manvers (Northumberland and Durham County), and Gwillimbury. West (Simcoe County). The exclusion of data for these two municipalities is statistically instendicant.
- The dollar figures, except ratios, have all been rounded to the nearest \$'000s, with the further exception of dollar figures used in the lootnotes. This means that horizontal and vertical totals may not equal the sum of the components
- 3 Every effort has been made to make a reader's task easier, by reducing the number of footnotes to a minimum, consistent with accurate and meaningful reporting. It will be noticed, therefore, that throughout these publications only significant items have been made the subject of footnotes.

Volume 2. Parts A - J

The reader is advised to consult, in addition to these notes, the "introduction" to Volume 1. The following comments are generally restricted to items unique to this Volume.

1. The information is presented in the following format:

Metropolitan Toronto Area — Part A Niagara Regional Area — Part A

Ottawa-Carleton Regional Area - Part A

York Regional Area — Part A Muskoka District Area — Part A

Counties Parts B — J: certain adjacent counties are grouped together in one Part. Thus, every municipality, both upper and lower tier, is listed in one of the Parts.

- 2 In the case of the metropolitan, regional and district areas, the total lines are after the "contra" items have been removed
- 3. As in Volume 1, "N.A." means "Not Applicable" and "NEGL" means "Negligible in amount"

Bemographics

Population: Please refer to comments pertinent to Volume 1 Households: Please refer to comments pertinent to Volume 1

Equalized Taxable Assessment

Identical to "Provincial Equalized Taxable Assessment" and "Taxable Assessment: Equalized" in Volume 1,

Assessment for Current Year

Taxable by School Support: Public; Separate; Total, Identical to "Assessment Used for 1971 Taxes" in Volume 1.

As Per Return By Property Class: Identical to the equivalent data in Volume 1, with the addition of a "Total" column.

Each Property Class — % of Total: Shows the size of each of the four classes of property, in percentage terms, relative to the total assessment

-

Residential and Farm Tax Burden

Per capita; % Total Taxation: Indicates the residential, and farm taxation (municipal and school purposes) per capital and as a percentage of total taxation, municipal and school purposes).

Tax Roll Analysis

Identical to corresponding figures in Volume 1.

Current Year End Tax Arrears

Identical to corresponding figures in Volume 1.

Year End Taxation Detail

Identical to corresponding figures in Volume 1.

Pertinent Current Year Items

Identical to corresponding figures in Volume 1.

Revenue Fund: Revenues

Presents the same information that appears in Volume 1 with some small differences in the order of the items, and in the terminology used.

Revenue Fund: Revenue Component Analysis

This new analysis displays the relative size, in percentage terms, of the components of Revenue Fund: Revenues. Because of rounding, the sum of the components may not total to 100%.

Revenue Fund: Own Expenditures

Identical to the "Statements of Expenditure: General Municipal Expenditures" in Volume 1.

Revenue Fund: Transfers

Identical to the "County: Share of Expenditure" and "Education — Local Contributions" in Volume 1.

Total Own Expenditures and Transfers

Identical to "Total Expenditure" in Volume 1.

Revenue Fund Surplus/Delicit

Identical to "Excess/(Deficiency) of Revenue in 1971" in Volume 1.

Own Expenditures and Transfers: Component Analysis

This new analysis displays, at the main function level, the relative size, in percentage terms, of the components of Revenue Fund: Own Expenditures and Transfers.

Capital Fund: Sources

Very similar to the corresponding figures in Volume 1.

Capital Fund: Own Applications

Identical to the corresponding figures in Volume 1.

Capital Fund Transfers

Identical to the corresponding figures in Volume 1.

Total Own Applications and Transfers

The total of the two previous items.

Capital Fund Liquidity Change

This item represents the year's excess of Capital Fund: Sources, over, Total Own Applications and Transfers, or vice versa.

Net Long Term Debt Reconciliation

Very similar to the corresponding figures in Volume 1.

Net Long Term Debt

Identical to "Total Net Long Term Liabilities: Per Capita; As Per Cent of Equalized Assessment" in Volume 1.

Net Long Term Debt Charges Analysis

Very similar to the corresponding figures in Volume 1.

Concluding Comment

These publications represent the first step towards the provision of fully-integrated municipal information. In the future, with increasing demands at all levels of government for this type of information, the Ministry will be better able to answer both generic and ad hoc requests. The process of development and refinement is, by its very nature, an on-going one, and the Ministry welcomes constructive criticisms and suggestions about the format and contents of these publications. Such comment, and any inquiries about the contents of these publications, should be addressed to:

INTRODUCTIONiv	FINANCIAL ETC. INFORMATION Page
TABLE OF CONTENTSvi	INDEX(i

1971 HIGHLIGHTS

- 1971 population exceeds 7,388,000 persons. The year to year absolute increase, 173,000 persons, is the biggest of the past decade. The relative increase, 2.4%, is slightly higher than the 2.2% average for the previous ten years.
- 1971 taxation revenue, \$1,499.7 million rose 2.8% versus 10.5% in the previous year, with the main Property Tax Reduction Program allowed for in both cases. If allowance is made for the supplementary payments under the program, the increases respectively drop to 0.5% and 8.5%.
- Provincial grants paid to municipalities and school boards, \$1,701.3 million, equalled 113.4% of 1971 taxation revenue. This compares to 97.1% in 1970. Again, allowing for the supplementary payments, these ratios rise to 115.2% and 99.2% respectively.
- 1971 operating revenues were reported to be \$2,218.3 million, up 7.2%. The
 increase in such revenues slightly exceeded the rise in expenditures. As a
 result, there was an aggregate \$3.7 million surplus.
- Contributions to education, coming from local taxation in 1971 totalled \$756.6 million. They accounted for 35.2% of local municipalities' total revenue. The figures for 1970 were \$817.6 million and 40.4%.
- 1971 capital expenditures reached a record \$433.3 million, up 27.4% from 1970.
 A net \$130.8 million, or 30.2%, of such expenditures still needed to be permanently financed at the end of 1971.
- At the end of 1971, taxes receivable totalled \$128.5 millions (before \$9.5 million allowance for uncollectable taxes), representing 8.6% of aggregate 1971 tax rolls. The year earlier figures were \$132.2 millions and 9.1%.
- Net long term liabilities of municipalities and their enterprises were \$1,706.1 million (excluding \$348.9 million for certain school board debt reported herein) at year end 1971. The year to year increase was \$65.0 million or 4.0%.

1971 municipal financial reports

VOLUME 2D

municipalities situated within
the counties of
halton, peel, waterloo,
wellington, wentworth

FOREWORD

It gives me pleasure to release the 1971 MUNICIPAL FINANCIAL REPORTS DATA publications.

These new publications, which replace the "Summary of Financial Reports of Municipalities", represent a further step along the road to meaningful local sector financial information. This new series includes certain useful information not previously available. Further, the presentation of the data has been substantially altered to meet the needs of specific user groups. Lastly, these releases represent the culmination of the development of an automated system created to generate these publications. The reader is invited to refer to the Introduction immediately following for further elaboration.

INTRODUCTION

General: The 1971 series of publications, which replaces the "Summary of Financial Reports of Municipalities" (S.F.R.M.), mark the first phase of customized, computer-based information reports produced by the Ontario Municipal Finance Information System (O.M.F.L.S.), within the Municipal Finance Branch, Ministry of Treasury, Economics and Intergovernmental Affairs.

Development and data conversion problems caused the delay in the production of this first series. The equivalent 1972 series is scheduled to be available in the fall of 1973.

Demands for municipal information are increasing both within and outside the Province. This makes it imperative that the basis of such information, primarily the annual municipal Financial Reports, be soft accepted and assessing and assessing the promptly after the end of the year to which the data relate. In order to achieve the fall deadline for future years, it will be necessary to adhere far more strictly to the statutory filing date of March 31st. In turn, this will mean that it will not be possible to accept Financial Reports for inclusion in the publications, which are filed long after the March 31st deadline.

With the increased flexibility which has been incorporated in the new automated system, it will be possible in the future, to provide more meaningful information geared to specific user requirements.

Series of 1971 Publications

Volume 1, Part 1: The Aggregate Scene: Presents a summary of data for all the municipalities in the Province. The equivalent 1970 data are to be found on pages XXVI to XXXVII of Volume 1 of the 1970 S.F.R.M.

Volume 1, Part 2: Highlight Items: Larger Municipalities: An analysis of highlights data signer for the arger municipality of the arger municipality in the metropolitan, regional and district areas.

Volumes 2A — 2J: Municipal Financial Reports Data: An analysis of data for all municipalities in the Province configured on an upper tier (metropolitan, regional, district and county municipalities) basis. These data contain not only the detailed data that have been produced historically, but are presented on an upper tier configuration with the information grouped geographically, so that the reader is not burdened with unnecessary information.

Index: A master index appears at the back of all Volumes which keys the reader to the Volume. Part, and page number where data for a particular municipality appear

The "Commentary" which appeared in Volume 1 of the 1970 S.F.R.M. does not appear in this new series of publications. The equivalent data that appeared in the "Commentary" will be incorporated in separate publications, and only the "Highlights" information features in this series

Volume 1 (Parts 1 and 2) will be circulated to all the regular recipients of the previous series Volumes 2A — 2J are configured on an adjacent, upper tier basis rather than by population, as formerly was the case. These latter Volumes comprise ten separate publications, and each municipality will automatically receive the appropriate Volume 2 publication. The complete set of the Volumes 2A—2J are available on request.

Because the methods of summarization, presentation of the data, and certain terminology are somewhat changed, the remaining comments have been prepared as a guide to the reader.

Atthough the comments and data in each of the two Volumes are freestanding, a reader is advised to study the "Guide for the Reader" in both Volumes before comparisons and analyses are conducted

Guide for the Reader

- 1 Information for two municipalities was not available for inclusion in these publications. These two municipalities are, the Township of Manvers (Northumberland and Durham County), and Gwillimbury, West (Simcoe County). The exclusion of data for these two municipalities is statistically insignificant.
- The dollar figures, except ratios, have all been rounded to the nearest \$'000s, with the further exception of dollar figures used in the footnotes. This means that horizontal and vertical totals may not equal the sum of the components.
- 3 Every effort has been made to make a reader's task easier, by reducing the number of footnotes to a minimum, consistent with accurate and meaningful reporting. It will be noticed, therefore, that throughout these publications only significant items have been made the subject of footnotes.

Volume 2, Parts A - J

The reader is advised to consult, in addition to these notes, the "Introduction" to Volume 1. The following comments are generally restricted to Items unique to this Volume.

1. The information is presented in the following format:

Metropolitan Toronto Area — Part A Niagara Regional Area — Part A

Ottawa-Carleton Regional Area — Part A York Regional Area — Part A

Muskoka District Area — Part A

Counties: Parts B — J: certain adjacent counties are grouped together in one Part Thus, every municipality, both upper and lower tier, is listed in one of the Parts.

- 2. In the case of the metropolitan, regional and district areas, the total lines are after the "contra" items have been removed
- 3. As in Volume 1, "N.A." means "Not Applicable" and "NEGL" means "Negligible in amount".

Demographics

Population: Please refer to comments pertinent to Volume 1 Households: Please refer to comments pertinent to Volume 1

Equalized Taxable Assessment

Identical to "Provincial Equalized Taxable Assessment" and "Taxable Assessment: Equalized" in Volume 1.

Assessment for Current Year

Taxable by School Support: Public; Separate; Total: Identical to "Assessment Used for 1971 Taxes" in Volume 1.

As Per Return By Property Class: Identical to the equivalent data in Volume 1, with the addition of a "Total" column

Each Property Class — % of Total: Shows the size of each of the four classes of property, in percentage terms, relative to the total assessment.

Residential and Farm Tax Burden

Per capita; % Total Taxation: Indicates the residential, and farm taxation (municipal and school purposes) per capita, and as a percentage of total taxation (municipal and school purposes).

Tax Roll Analysis

Identical to corresponding figures in Volume 1.

Current Year End Tax Arrears

Identical to corresponding figures in Volume 1.

Year End Taxation Details

Identical to corresponding figures in Volume 1.

Pertinent Current Year Items

Identical to corresponding figures in Volume 1.

Revenue Fund Revenues

Presents the same information that appears in Volume 1 with some small differences in the order of the items, and in the terminology used

Revenue Fund: Revenue Component Analysis

This new analysis displays the relative size, in percentage terms, of the components of Revenue Fund: Revenues Because of rounding, the sum of the components may not total to 100%.

Revenue Fund: Own Expenditures

Identical to the "Statements of Expenditure: General Municipal Expenditures" in Volume 1.

Revenue Fund: Transfers

Identical to the "County: Share of Expenditure" and "Education — Local Contributions" in Volume 1.

Total Own Expenditures and Transfers

Identical to "Total Expenditure" in Volume 1.

Revenue Fund Surplus/(Delicity

Identical to "Excess/(Deficiency) of Revenue in 1971" in Volume 1.

Own Expenditures and Transfers: Component Analysis

This new analysis displays, at the main function level, the relative size, in percentage terms, of the components of Revenue Fund: Own Expenditures and Transfers.

Capital Fund Sources

Very similar to the corresponding figures in Volume 1.

Capital Fund: Own Applications

Identical to the corresponding figures in Volume 1.

Capital Fund: Transfers

identical to the corresponding figures in Volume 1.

Total Own Applications and Transfers

The total of the two previous items

Capital Fund Liquidity Change

This item represents the year's excess of Capital Fund: Sources, over, Total Own Applications and Transfers, or vice versa

Net Long Term Debt Reconciliation

Very similar to the corresponding figures in Volume 1.

Net Long Term Debt

Identical to "Total Net Long Term Liabilities: Per Capita; As Per Cent of Equalized Assessment" in Volume 1

Net Long Term Debt Charges Analysis

Very similar to the corresponding figures in Volume 1.

Concluding Comment

These publications represent the first step towards the provision of fully-integrated municipal information. In the future, with increasing demands at all levels of government for this type of information, the Ministry will be better able to answer both generic and ad not requests. The process of development and refinement is, by its very nature, an on-going one, and the Ministry welcomes constructive criticisms and suggestions about the format and contents of these publications. Such comment, and any inquiries about the contents of these nublications, should be addressed to:

TABLE OF CONTENTS vi	INDEX

1971 HIGHLIGHTS

- 1971 population exceeds 7,388,000 persons. The year to year absolute increase, 173,000 persons, is the biggest of the past decade. The relative increase, 2.4%, is slightly higher than the 2.2% average for the previous ten years.
- 1971 taxation revenue, \$1,499.7 million rose 2.8% versus 10.5% in the previous year, with the main Property Tax Reduction Program allowed for in both cases. If allowance is made for the supplementary payments under the program, the increases respectively drop to 0.5% and 8.5%.
- Provincial grants paid to municipalities and school boards, \$1,701.3 million, equalled 113.4% of 1971 taxation revenue. This compares to 97.1% in 1970.
 Again, allowing for the supplementary payments, these ratios rise to 115.2% and 99.2% respectively.
- 1971 operating revenues were reported to be \$2,218.3 million, up 7.2%. The increase in such revenues slightly exceeded the rise in expenditures. As a result, there was an aggregate \$3.7 million surplus.
- Contributions to education, coming from local taxation in 1971 totalled \$756.6 million. They accounted for 35.2% of local municipalities' total revenue. The flaures for 1970 were \$817.6 million and 40.4%.
- 1971 capital expenditures reached a record \$433.3 million, up 27.4% from 1970.
 A net \$130.8 million, or 30.2%, of such expenditures still needed to be permanently financed at the end of 1971.
- At the end of 1971, taxes receivable totalled \$128.5 millions (before \$9.5 million allowance for uncollectable taxes), representing 8.6% of aggregate 1971 tax rolls. The year earlier figures were \$132.2 millions and 9.1%.
- Net long term liabilities of municipalities and their enterprises were \$1,706.1 million (excluding \$348.9 million for certain school board debt reported herein) at year end 1971. The year to year increase was \$65.0 million or 4.0%.

# 1971 municipal financial reports

**VOLUME 2E** 

municipalities situated within
the counties of
bruce, dufferin, grey,
huron, simcoe

# **FOREWORD**

It gives me pleasure to release the 1971 MUNICIPAL FINANCIAL REPORTS DATA publications.

These new publications, which replace the "Summary of Financial Reports of Municipalities", represent a further step along the road to meaningful local sector financial information. This new series includes certain useful information not previously available. Further, the presentation of the data has been substantially altered to meet the needs of specific user groups. Lastly, these releases represent the culmination of the development of an automated system created to generate these publications. The reader is invited to refer to the Introduction immediately following for further elaboration.

# INTRODUCTION

General: The 1971 series of publications, which replaces the "Summary of Financial Reports of Municipalities" (S.F.R.M.), mark the first phase of customized, computer-based information reports produced by the Ontario Municipal Finance Information System (O.M.F.I.S.), within the Municipal Finance Branch, Ministry of Treasury, Economics and Intergovernmental Affairs

Development and data conversion problems caused the delay in the production of this first series. The equivalent 1972 series is scheduled to be available in the fall of 1973.

Demands for municipal information are increasing both within and outside the Province. This makes it imperative that the basis of such information, primarily the annual municipal Financial Reports, be both accurate and available promptly after the end of the year to which the data relate in order to achieve the fall deadline for future years, it will be necessary to adhere far more strictly to the statutory filing date of March 31st. In turn, this will mean that it will not be possible to accept Financial Reports for inclusion in the publications, which are filed long after the March 31st deadline.

With the increased flexibility which has been incorporated in the new automated system, it will be possible in the future, to provide more meaningful information geared to specific user requirements.

### Series of 1971 Publications

Volume 1, Part 1: The Aggregate Scene: Presents a summary of data for all the municipalities in the Province. The equivalent 1970 data are to be found on pages XXVI to XXXVII of Volume 1 of the 1970 S F R M.

Volume 1, Part 2: Highlight Items: Larger Municipalities: An analysis of highlights data is given for the larger municipalities (5.000 population or greater), including, in addition, each municipality in the metropolitan, regional and district areas.

Volumes 2A — 2J: Municipal Financial Reports Date: An analysis of data for all municipalities in the Province configured on an upper tier (metropolitan, regional, district and county municipalities) basis. These data contain not only the detailed data that have been produced historically, but are presented on an upper tier configuration with the information repuped geographically, so that the reader is not burdened with unnecessary information.

Index: A master index appears at the back of all Volumes which keys the reader to the Volume. Part, and page number where data for a particular municipality appear.

The "Commentary" which appeared in Volume 1 of the 1970 S.F.R.M. does not appear in this new series of publications. The equivalent data that appeared in the "Commentary" will be incorporated in separate publications, and only the "Highlights" information features in this series.

Volume 1 (Parts 1 and 2) will be circulated to all the regular recipients of the previous series. Volumes 2A — 2J are configured on an adjacent, upper tier basis rather than by population, as formerly was the case. These latter Volumes comprise ten separate publications, and each municipality will automatically receive the appropriate Volume 2 publication. The complete set of the Volumes 2A—2J are available on request.

Because the methods of summarization, presentation of the data, and certain terminology are somewhat changed, the remaining comments have been prepared as a guide to the reader.

Although the comments and data in each of the two Volumes are freestanding, a reader is advised to study the "Guide for the Reader" in both Volumes before comparisons and analyses are conducted

### Guide for the Reader

- 1 Information for two municipalities was not available for inclusion in these publications. These two municipalities are: the Township of Manvers (Northumberland and Durham County), and Gwillimbury. West (Simcoe County). The exclusion of data for these two municipalities is statistically insignificant.
- The dollar figures, except ratios, have all been rounded to the nearest \$'000s, with the further exception of dollar figures used in the footnotes. This means that horizontal and vertical totals may not equal the sum of the components.
- 3 Every effort has been made to make a reader's task easier, by reducing the number of footnotes to a minimum, consistent with accurate and meaningful reporting. It will be noticed, therefore, that throughout these publications only significant items have been made the subject of footnotes

### Volume 2, Parts A - J

The reader is advised to consult, in addition to these notes, the "Introduction" to Volume 1. The following comments are generally restricted to items unique to this Volume.

The information is presented in the following format:
 Metropolitan Toronto Area — Part A
 Niagara Regional Area — Part A
 Ottawa-Carleton Regional Area — Part A
 York Regional Area — Part A
 Muskoka District Area — Part A

Counties Parts B - J: certain adjacent counties are grouped together in one Part. Thus, every municipality, both upper and lower tier, is listed in one of the Parts.

- 2. In the case of the metropolitan, regional and district areas, the total lines are after the "contra" items have been removed.
- 3. As in Volume 1, "N.A." means "Not Applicable" and "NEGL" means "Negligible in amount".

### Demographics

Population: Please refer to comments pertinent to Volume 1 Households: Please refer to comments pertinent to Volume 1

### **Equalized Taxable Assessment**

Identical to "Provincial Equalized Taxable Assessment" and "Taxable Assessment: Equalized" in Volume 1.

### Assessment for Current Year

Taxable by School Support: Public; Separate; Total: Identical to "Assessment Used for 1971 Taxes" in Volume 1.

As Per Return By Property Class: Identical to the equivalent data in Volume 1, with the addition of a "Total" column.

Each Property Class — % of Total: Shows the size of each of the four classes of property, in percentage terms, relative to the total assessment.

### Residential and Farm Tax Burden

Per capita; % Total Taxation: Indicates the residential, and farm taxation (municipal and school purposes) per capita, and as a percentage of total taxation (municipal and school purposes).

#### Tax Roll Analysis

Identical to corresponding figures in Volume 1.

### Current Year End Tax Arrears

Identical to corresponding figures in Volume 1.

### Year End Taxation Details

Identical to corresponding figures in Volume 1.

### Pertinent Current Year Items

Identical to corresponding figures in Volume 1.

### Revenue Fund: Revenues

Presents the same information that appears in Volume 1 with some small differences in the order of the Items, and in the terminology used.

### Revenue Fund: Revenue Component Analysis

This new analysis displays the relative size, in percentage terms, of the components of Revenue Fund: Revenues. Because of rounding, the sum of the components may not total to 100%.

### Revenue Fund: Own Expenditures

Identical to the "Statements of Expenditure: General Municipal Expenditures" in Volume 1.

#### Revenue Fund: Transfers

Identical to the "County: Share of Expenditure" and "Education — Local Contributions" in Volume 1.

#### Total Own Expenditures and Transfers

Identical to "Total Expenditure" in Volume 1.

### Revenue Fund Surplus/(Deficit)

Identical to "Excess/(Deficiency) of Revenue in 1971" in Volume 1.

### Own Expenditures and Transfers: Component Analysis

This new analysis displays, at the main function level, the relative size, in percentage terms, of the components of Revenue Fund: Own Expenditures and Transfers.

#### Capital Fund: Sources

Very similar to the corresponding figures in Volume 1.

### Capital Fund: Own Applications

Identical to the corresponding figures in Volume 1.

#### Capital Fund: Transfers

Identical to the corresponding figures in Volume 1.

### Total Own Applications and Transfers

The total of the two previous items.

#### Capital Fund Liquidity Change

This item represents the year's excess of Capital Fund: Sources, over, Total Own Applications and Transfers, or vice versa.

### Net Long Term Debt Reconciliation

Very similar to the corresponding figures in Volume 1.

#### Net Long Term Debt

Identical to "Total Net Long Term Liabilities: Per Capita; As Per Cent of Equalized Assessment" in Volume 1.

### Net Long Term Debt Charges Analysis

Very similar to the corresponding figures in Volume 1.

#### Concluding Comment

These publications represent the first step towards the provision of fully-integrated municipal information. In the future, with increasing demands at all levels of government for this type of information, the Ministry will be better able to answer both generic and ad hor requests. The process of development and refinement is, by its very nature, an on-going one, and the Ministry welcomes constructive criticisms and suggestions about the format and contents of these publications. Such comment, and any inquiries about the contents of these publications, should be addressed to:

## 1971 HIGHLIGHTS

- 1971 population exceeds 7 388 000 persons. The year to year absolute increase,
   173 000 persons is the biggest of the past decade. The relative increase,
   2 4%,
   Is slightly higher than the 2.2% average for the previous ten years.
- 1971 taxation revenue, \$1,499.7 million rose 2.8% versus 10.5% in the previous year, with the main Property Tax Reduction Program allowed for in both cases. If allowance is made for the supplementary payments under the program, the increases respectively drop to 0.5% and 8.5%.
- Provincial grants paid to municipalities and school boards, \$1,701.3 million, equalled 113.4% of 1971 taxation revenue. This compares to 97.1% in 1970. Again, allowing for the supplementary payments, these ratios rise to 115.2% and 99.2% respectively.
- 1971 operating revenues were reported to be \$2,218.3 million, up 7.2%. The
  increase in such revenues slightly exceeded the rise in expenditures. As a
  result, there was an aggregate \$3.7 million surplus.
- Contributions to education, coming from local taxation in 1971 totalled \$756.6 million. They accounted for 35.2% of local municipalities' total revenue. The figures for 1970 were \$817.6 million and 40.4%.
- 1971 capital expenditures reached a record \$433.3 million, up 27.4% from 1970.
   A net \$130.8 million, or 30.2%, of such expenditures still needed to be permanently financed at the end of 1971.
- At the end of 1971, taxes receivable totalled \$128.5 millions (before \$9.5 million allowance for uncollectable taxes), representing 8.6% of aggregate 1971 tax rolls. The year earlier figures were \$132.2 millions and 9.1%.
- Net long term liabilities of municipalities and their enterprises were \$1,706.1 million (excluding \$348.9 million for certain school board debt reported herein) at year end 1971. The year to year increase was \$65.0 million or 4.0%.
